Full Stack Developer

Results-driven **Java Full Stack Developer** with **5 years** of experience designing and developing scalable enterprise applications. Expertise in **Java, Spring Boot, Microservices, ReactJS, and Cloud technologies**. Proven track record in building high-performance systems handling millions of daily transactions while maintaining 99.9% availability.

- Extensive experience in **Java Enterprise Development** using **Spring Framework, Spring Boot, Hibernate, JPA,** and **JDBC** for building robust backend systems
- Designed and implemented **RESTful APIs, Microservices Architecture,** and **Event-Driven Systems** using **Apache Kafka** and reactive programming with **Project Reactor**
- Proficient in modern **Frontend Development** with **ReactJS, JavaScript, Material-UI, Context API,** and **Axios** for building responsive user interfaces
- Strong expertise in **Test-Driven Development (TDD)** using **JUnit, Mockito,** and **SonarQube** with focus on high code coverage and quality
- Experienced in **CI/CD pipelines** using **Jenkins, Git, Maven, Harness** and API testing with **Postman** and **Swagger**
- Comprehensive knowledge of **System Design, Microservices Patterns, Database Design,** and **Cloud Computing** principles with hands-on **GCP** experience
- Proven ability in **Agile/Scrum methodologies, SDLC processes,** and cross-functional collaboration using **JIRA, Confluence,** and team communication tools

Technical Skills

Languages	:	Java, SQL, JavaScript, C#, Python
Frameworks	:	Spring Boot, Spring MVC, Hibernate, JPA, REST APIs, ASP.NET Core Web API
Frontend	:	2 years (React.js, React Router, Material-UI, Context API, Axios, HTML5, CSS3)
Databases	:	MySQL, SQL Server, Oracle Database, Google BigQuery
DevOps	:	Git, Maven, Jenkins, SonarQube, CI/CD, Basics (Docker, Kubernetes, Harness)
Testing	:	JUnit, Mockito, Postman, Swagger, Functional Testing
Cloud	:	Basics (Google Cloud Platform (GCP), Cloud Computing, BigQuery, AWS(EC2, RDS, S3, ELB))
Messaging	:	Apache Kafka, JMS, Event-Driven Architecture
Concepts	:	Microservices, REST APIs, System Design, Data Structures, Algorithms, OOP, MVC, Agile/Scrum

Professional Experience

Technical Specialist — May 2026 - present
Zensar Technologies (Client: American Express) — *Hybrid - Bangalore, KA, India*

- Developing scalable enterprise applications using **Java, Spring Boot, and Microservices Architecture** for American Express financial platforms
- Building and maintaining high-performance **RESTful APIs** with focus on security, scalability, and low-latency transaction processing
- Implementing **Reactive Programming** using Project Reactor and Spring WebFlux to handle asynchronous and high-throughput workflows
- Working with **Apache Kafka** for real-time event-driven communication and distributed message processing across microservices
- Designing resilient microservices with centralized logging, exception handling, caching strategies, and performance optimization techniques
- Collaborating with cross-functional teams in Agile environment for feature delivery, production support, and cloud-native application enhancements

Software Engineer — Sep 2024 - May 2026
ACL Digital (Client: PayPal) — *Remote - Bangalore, KA, India*

- Developed and maintained PayPal's Customer Orchestration Service handling **11M+ daily requests** across **300+ REST endpoints** using reactive programming with Project Reactor
- Achieved **99.9% system availability** and **100% unit test coverage** through comprehensive testing strategies and performance optimization
- Implemented caching strategies and API optimizations that improved response times and system scalability
- Resolved critical production issues in real-time, ensuring seamless customer operations and minimal downtime
- Engineered Spring Batch-based financial reconciliation system processing **millions of transactions daily** for payment discrepancy correction
- Integrated SFTP workflows, external REST services, and multi-schema Oracle databases to automate financial corrections and ensure regulatory compliance

Associate Engineer Nov 2021 – Aug 2024
Virtusa Consulting Services *Onsite - Chennai, TN, India*

- Developed scalable Java-based web applications for PNC Bank's BFS Amer project using **Spring Boot, Microservices, and ReactJS**
- Engineered **RESTful APIs** with Swagger documentation and implemented microservices architecture for banking applications
- Enhanced API performance and system scalability for AZ Healthcare by **40%** through legacy system modernization and Spring Boot upgrades
- Implemented optimized RESTful services and enforced coding standards using Git, reducing defects by **40%**

Education

JNTU - Siddhartha Institute of Engineering & Technology Puttur, AP, India
Master of Computer Applications (MCA) *Aug 2019 – Aug 2021*

SVU University Tirupati, AP, India
Bachelor of Science in Computer Science *Jun 2016 – Apr 2019*

Technical Projects

PayPal - Customer Data Access Service (CDAS) *Java, Spring Boot, Microservices, REST APIs, BigQuery, Kafka, JUnit*

- Designed and implemented **30+ REST API endpoints** using JSON-based service orchestration and data transformation pipelines
- Integrated **30+ internal PayPal services** for customer support workflows, ensuring seamless data flow and system interoperability
- Implemented intelligent caching strategies and error handling mechanisms to support **11+ million daily requests**
- Developed comprehensive unit test suites and maintained technical documentation for configuration patterns
- Collaborated on microservices design, CI/CD pipeline configurations, and multi-tenant architecture for enterprise-scale deployment

PayPal Payments Reconciliation System *Java, Spring Boot, Spring Batch, REST APIs, Microservices, Oracle Database*

- Developed Spring Batch pipelines to detect and correct payment discrepancies across multiple transaction systems
- Implemented advanced deduplication, missing record reconstruction, and authorization reversal logic for financial datasets
- Integrated external REST services with Hystrix-based circuit breaker patterns for resilient communication
- Built automated SFTP ingestion workflows and optimized Oracle DB operations using JPA/Hibernate
- Achieved **99% processing accuracy** and **85% reduction in manual interventions** while ensuring SOX/PCI-DSS compliance

AZ Healthcare System Modernization *Java, Spring Boot, Git, REST APIs, MySQL, Swagger UI*

- Orchestrated Spring Boot version upgrade project, emphasizing system efficiency and security improvements
- Spearheaded version migration strategy that enhanced system performance by **40%**
- Enforced coding standards with Git, reducing defects by **40%** and ensuring seamless migration
- Developed and documented REST APIs using Swagger UI for comprehensive API specification

PNC Bank BFS Amer Application *java, Spring Boot, Microservices, JavaScript, ReactJS, MySQL, REST APIs*

- Led development of scalable Java-based web applications using Spring Boot and microservices architecture
- Engineered robust RESTful APIs with Swagger documentation for streamlined integration
- Developed dynamic frontend solutions using ReactJS, JavaScript, and Material-UI
- Implemented server-side programs using Servlets, JSP, and JDBC for efficient database operations
- Applied Agile methodology and Core Java concepts to enhance system responsiveness and reliability

Certifications

- Oracle Certified Associate (OCA) - Oracle
- Associate Cloud Engineer - Google Cloud Platform (GCP)
- Career Essentials in Generative AI - Microsoft & LinkedIn
- Generative AI Fundamentals - Google Cloud Skills Boost
